WORK EXPERIENCE

Spiegel Design Group (SDG)

Front-End Engineer

Jun 2023 - Jul 2026

Remote

- Shipped customer-facing web features for Netflix Shop, Barnes & Noble, Peet's Coffee, Indigo, and Rare Beauty across projects using React, TypeScript, JavaScript, Liquid, and Sanity.
- Refactored Indigo's storefront inventory and fulfillment logic around Shopify's GraphQL Storefront API, replacing Flow-managed data and connecting product availability, store selection, pickup, split fulfillment, and cart updates across 135+ stores.
- Developed blog and gift card pages for Barnes & Noble's Hydrogen storefront using reusable React components written in TypeScript, Sanity content models, and server-side data loading.
- Built Rugs USA's B2B project workflow in React and TypeScript, connecting Swym wishlists to Shopify carts so customers could manage product lists, edit quantities, add items in bulk, and download PDFs.
- Owned end-to-end delivery, including requirements, estimation, implementation, automated unit and component tests, cross-browser and device checks, production deployment, and post-release verification.

Inception Fertility

Front-End Developer

Feb 2022 - Jun 2023

Houston, TX

- Designed, built, and deployed a full-stack KPI reporting application for internal teams to review metrics by clinic, using SQL to process the data and Chart.js to visualize results.
- Designed and delivered an access-controlled REST API for an external partner, working with their team to define data requirements and validate the integration.
- Developed features for an internal platform used across multiple fertility clinics, using Node.js and Express for backend APIs and Vue for frontend interfaces.
